- b. **Safety Recommendations.** AAA recommends that people do not drive during times that they are normally asleep. Extra care should be taken during the afternoon "dip" in energy, between 1300-1600, where there is a spike in the number of sleep-related crashes. As a viable alternative to the intake of caffeine to stay alert, AAA highly recommends tired drivers stop driving and find a safe place to get a full night's rest. The following crash-preventive options should be adhered to:
 - Drive with others in the vehicle (talk amongst, share driving, etc.)
 - Get a full night's rest before traveling
 - Stop every 2 hours or 100 miles and take a break

c. **Policy.** Absent prior written approval, personnel will not travel away from the ship's

homeport beyond the below limits.

	LIBERTY DAYS	ALLOWABLE DISTANCE FROM HOMEPORT
USS		
GEORGE	2 (normal weekend liberty)	400 miles
WASHINGTO N	3 (72 hour liberty)	500 miles
Liberty Policy	4 (96 hour liberty)	600 miles
(SORM)		

Should an individual plan to exceed these limits for any reason, a prior written request chit and a Travel Risk Assessment must be approved and signed by the Department Head, XO, or CO, and routed through the Safety Department. Further, under no circumstance shall anyone exceed 750 miles from the ship's homeport while in a liberty status, or spend greater than 14 hours behind the wheel in a 24-hour period. It is the individual's responsibility to ensure his/her travel plans do not exceed these limits. All personnel must exercise discretion and sound judgment concerning distances traveled on leave and liberty, and special consideration must be given to weather and road conditions. This article is punitive and requires no further implementation.
